## It's a Fact: Your Friends, Family, Students, Patients...They Drink Soda

Today, Americans drink about as much traditional soda as they do water. That's not just "bottled" water—that's ALL water. Domestic sales alone are approximately \$65 Billion, The vast majority of traditional sodas contain unhealthy ingredients and we believe that people deserve better.

### Healthy Soda?

Soda is not a "health drink." Drinking our soda will not make you brilliant, live forever, or give you the power to fly. It is about fun and exuberance and it's an indulgence. However, unlike most traditional sodas (which are loaded up with unhealthy ingredients like high fructose corn syrup, artificial flavors, artificial sweeteners, phosphoric acid and chemical preservatives) conversely, there is NOTHING in our products that is unhealthy. That's a huge difference and it is one that you and the people you care about deserve.

### Snow

Snow is more than just a natural soda or the beautiful flakes that fall on winter days. To us, it's also a movement, a thirst for life and a flat-out rejection of the status quo. Snow Natural Soda + Vitamins – all the fun and delicious indulgence of soda without any of the unhealthy ingredients.

**"As I work with patients on restricted diets, I was thrilled to find a natural alternative to traditional soda like Snow to recommend to my patients. The response has been great!"**

- Chrissy Hammond MS, RD, LD

**"Being a renal dietitian who works with patients on hemodialysis, it has been very difficult trying to find beverages, especially a cola, that contain no phosphorus. Finally there is such a product. My patients are very excited that there is SNOW Pure Cola. They can drink SNOW cola without feeling guilty and they really love the flavor."**

- Kara Domaigne, RD
